ABOUT ME

Senior Full Stack Engineer with 15+ years of experience designing and building SaaS, fintech, and developer-focused platforms using Angular, React, NestJS, Node.js, PostgreSQL, NoSQL databases, and Docker.
Experienced in frontend architecture, scalable APIs, backend systems, product development, and technical leadership.
Founder and developer of multiple production-ready platforms and open-source projects.

WORK EXPERIENCE

FOUNDER & FULL STACK DEVELOPER – CRYPTOSTASH – 01/05/2025 – PORTUGAL

Cryptocurrency portfolio management platform focused on digital asset tracking and portfolio management.

- Designed and developed the platform architecture from scratch
- Built a scalable REST API using NestJS and Node.js
- Developed a modern frontend application with Angular 20
- Integrated PostgreSQL and Docker for data persistence and deployment
- Implemented authentication, portfolio tracking, and asset management features

Tech Stack: Angular 20, NestJS, Node.js, PostgreSQL, Docker

SENIOR FULL STACK ENGINEER – BNOTIFY – 01/11/2022 – ZURICH, SWITZERLAND

Website: https://bnotify.io

Push notification API platform delivering fast and optimized real-time notifications across web and mobile applications.

- Architected and developed a scalable notification platform and public REST API
- Built the frontend dashboard using Angular and the mobile application with React Native
- Designed backend services focused on performance and low-latency delivery
- Implemented authentication, API management, and notification delivery workflows
- Managed the platform infrastructure and deployment processes

Tech Stack: Angular, React Native, NestJS, Node.js, PostgreSQL, Docker

LEAD FRONTEND ENGINEER – ONE PM AG – 01/06/2015 – 31/08/2022 – ZURICH, SWITZERLAND

Business or Sector: Financial and insurance activities | **Website:** https://first.li

Fintech asset and portfolio management platform used for investment and financial operations.

- Led frontend development and architecture for a large-scale financial platform
- Built and maintained complex Angular applications focused on performance and scalability
- Designed reusable UI components and frontend architecture standards
- Worked closely with backend teams to integrate APIs and financial data services
- Managed frontend development processes, code quality, and team onboarding
- Mentored developers and contributed to technical decision-making and platform evolution

Tech Stack: Angular, TypeScript, JavaScript, HTML5, CSS3, Sass, REST APIs

SOFTWARE DEVELOPER – TEAMBOOK SA. – 01/03/2013 – 01/03/2015 – NYON, SWITZERLAND

Business or Sector: Administrative and support service activities | **Website:** http://teambookapp.com

Collaborative team management platform focused on scheduling, project sharing, and time tracking.

- Developed full-stack application features using Ruby on Rails and AngularJS
- Built responsive and interactive user interfaces for scheduling and project management workflows
- Implemented backend services, database integrations, and application business logic
- Improved frontend usability and application responsiveness across devices
- Collaborated with the development team on feature delivery, architecture, and product evolution

Tech Stack: Ruby on Rails, PostgreSQL, AngularJS, JavaScript, jQuery, CoffeeScript, HTML5, CSS3, Sass

SKILLS

Angular | Web Technologies: HTML5, CSS3 | Git/Github, Docker, Gitlab | Node.js e NPM | CI | TypeScript | RxJS | React | React Native | NestJS | REST API Development | PostgreSQL | MongoDB | MySQL | NoSQL Databases | Linux | Frontend Architecture | Scalable Systems Design | Code Reviews | Release Management | Agile Development

PROFESSIONAL STRENGTHS

Job-related skills

- Strong ownership and product-focused mindset
- Experience designing scalable and maintainable software architectures
- Effective technical communication and cross-team collaboration
- Mentoring and knowledge-sharing within engineering teams
- Focus on clean code, performance, and long-term maintainability
- Ability to lead projects from concept to production

COMPLEMENTARY TRAINING

Complementary training

Build AI-Powered Apps (codewithmosh.com)
NestJS Microservices (NestJS)
NestJS Authentication and Authorization (NestJS)
NestJS Fundamentals (NestJS)
The Ultimate React Native Series: Advanced Concepts (codewithmosh.com)
The Ultimate React Native Series: Fundamentals (codewithmosh.com)
The Ultimate Redux Course (codewithmosh.com 6 hours)
The Ultimate TypeScript Course (codewithmosh.com)
The Ultimate Git Course (codewithmosh.com 5.5 hours)
The Ultimate Docker Course (codewithmosh.com 5 hours)
Machine Learning in JavaScript with TensorFlow.js (Udemy 7 hours)
Restful API with Node JS, Restify and MongoDB with Typescript (Udemy 13 hours)
Docker for developers (Udemy 5.5 hours).
